

Cornerstones of Attachment Research

ROBBIE DUSCHINSKY

*Senior University Lecturer, Primary Care Unit, University of Cambridge
Fellow and Director of Studies, Sidney Sussex College*

OXFORD
UNIVERSITY PRESS

Contents

<i>Introduction</i>	vii
1. John Bowlby and the Tavistock Separation Research Unit	1
2. Mary Ainsworth and the Strange Situation Procedure	109
3. Mary Main, Erik Hesse, and the Berkeley Social Development Study	211
4. Alan Sroufe, Byron Egeland, and the Minnesota Longitudinal Study of Risk and Adaptation	337
5. Philip Shaver, Mario Mikulincer, and the Experiences in Close Relationships Scale	427
6. Conclusion	537
<i>Index</i>	573

Index

For the benefit of digital users, indexed terms that span two pages (e.g., 52–53) may, on occasion, appear on only one of those pages.

- AAI *see* Adult Attachment Interview (AAI)
- Abraham, K., 78
- abuse of child, 237
- Bowby, views of, 12, 32–34, 57
 - emotional, 305–6, 359–60, 384–85, 397–98, 544
 - factors breaking abuse cycle, 392
 - long-term effects, 96, 339–40, 353–54
 - and Minnesota study, 338, 339–40, 358–60, 392
 - physical, 33, 65, 88, 196, 237, 303–4, 318–19, 359–60, 376–78, 384–85, 389, 393
 - sexual, 33, 304, 305, 318–19, 355–56, 359–60, 398, 495
 - traumatic, 303–9
 - verbal, 33–34
- see also* intrusive intimacy; neglect
- action schemes, 346–47
- actual experience, psychoanalytic theory, 9–13, 96, 98–99
- adaptation, 17–18, 155–56
- global adaptive functioning, 386
 - and Minnesota study, 354
 - and pathology, 380, 381
 - self-report measures, 506–14
- ADHD *see* Attention Deficit Hyperactivity Disorder (ADHD)
- adolescence, Minnesota study group, 365–69
- Adult Attachment* (Gillath, Karantzias and Fraley), xiii
- Adult Attachment Interview (AAI), x, 193, 214–15, 216, 232–33, 235–36, 279–309, 312, 320–21, 399
- ‘Cannot Classify’ category, 307–9
 - clinical application, 325–26
 - coding manuals and systems, 265–66, 267, 285–86, 291, 294–95, 299–300, 301–3, 304, 305–6, 308–9, 315–16
- coherence, 288–93
- determining what is measured, 538–39
- development by Main, 17, 211–12, 216, 232–33, 428–29
- early experiences and continuity of care, 203
- earned security, 293–97
- four-category mode, 274–75, 559
- linked trajectories, 293–94
- and Minnesota study, 410, 411–12
- and priming, 214–15
- and rejection, 280, 281–82
- representations, 286–88
- secure base script, assessing, 180
- and self-report measures, 462–64, 465–67, 468–69, 482–85
- semantic and episodic information, 279–88
- and six-year systems, 259
- speech patterns, 282
- states of mind, 296, 301–2, 303, 558
- and Strange Situation classification system, 267, 285–86, 435–36, 437, 558
- traditions of attachment research, 461–62
- unresolved loss, 297–303
- unresolved traumatic abuse, 303–9
- see also* Main, M. (and Berkeley group)
- affect theory, 344–57
- emotional development, 344–49
 - felt security, xxv, 229–30, 349–52, 547
 - intrusive intimacy, 355–57
 - social affects, 352–55
- see also* emotion
- affectionate bonds, 16–17, 195–96
- aggression, xxiii–xxiv, 14–15, 74–75, 82, 140
- in adolescence, 388–89
- Ainsworth and Strange Situation, 126, 140, 142, 177–78

- aggression (*cont.*)
 and behavioural systems, 36–37, 43–44,
 47, 49–50
see also aggression behaviour system
 Minnesota study group, 359, 362–63
 self-report measures, 459, 495–97, 499–500
see also anger; emotion/emotional
 development
